

EIPR QUIZ

Unit I: Introduction to Entrepreneurship

Quiz Questions

Most Frequent Questions (High-Priority)

1. **Define Entrepreneur.**

An entrepreneur is an innovator and creator who identifies a business opportunity, organizes the necessary resources (like capital and labor), and assumes the associated risks to start and manage a new venture with the goal of earning a profit.

2. **Differentiate between an Entrepreneur and an Intrapreneur.**

- **Entrepreneur:** An independent individual who starts their own new business from scratch. They bear the full financial and business risks themselves and retain all the profits.
- **Intrapreneur:** An employee who acts like an entrepreneur *within* an existing organization. They innovate and drive new projects using the company's resources. The risk is borne by the company, and the rewards are shared.

3. **List four types of entrepreneurs.**

- **Innovative Entrepreneurs:** Pioneers who introduce new products, services, or technologies.
- **Imitative Entrepreneurs:** Adopt successful innovations created by others.
- **Fabian Entrepreneurs:** Cautious individuals who adopt innovations only when it becomes essential for survival.
- **Drone Entrepreneurs:** Resistant to change and stick to traditional methods, often leading to business failure.

Other Past Questions

1. **List any two characteristics of successful entrepreneurs.**

- **Self-Motivation:** The ability to push oneself to keep moving forward without external pressure.
- **Risk-Taking:** The willingness to take calculated risks to achieve potentially high rewards.

2. **List any two myths about entrepreneurship.**

- **Entrepreneurs are Born, Not Made:** The belief that entrepreneurship is an innate talent, when in reality, its skills can be learned.
- **A Good Idea is All You Need:** The assumption that a great idea alone guarantees success, ignoring the need for execution, planning, and resources.

3. **Why is risk-taking considered an essential trait for an entrepreneur?**

Risk-taking is essential because entrepreneurship involves inherent uncertainty. Entrepreneurs invest their own capital and time into new, unproven ideas. They must be willing to accept the risk of failure to pursue potentially high rewards, which allows them to seize opportunities that others might avoid.

4. **What is the primary difference between "entrepreneurship" and "entrepreneur"?**

- **Entrepreneur:** Refers to the *person*—the individual who starts a business.
- **Entrepreneurship:** Refers to the *process* or *activity*—the act of setting up and running a business.

Potential New Questions

1. **What is the scope of Entrepreneurship?**

The scope of entrepreneurship is vast, including starting new ventures, innovating within existing companies (intrapreneurship), creating social enterprises, and developing scalable startups. It spans all industries and sectors.

2. **Explain the importance of entrepreneurship in economic growth.**

Entrepreneurship drives economic growth by creating jobs, fostering innovation, generating wealth, and increasing competition, which leads to better products and services for consumers.

3. **What is an "entrepreneurial team" and why is it important?**

An entrepreneurial team is a group with diverse skills that collaborates to launch a venture. It's important for skill diversification, sharing the workload, better problem-solving, and increasing investor confidence.

4. **What is the role of E-cells on campus?**

Entrepreneurship Cells (E-cells) on campus aim to foster an entrepreneurial culture among students. They act as a bridge between students, faculty, alumni, and industry experts, helping students spot business ideas, develop plans, and connect with mentors and investors.

5. **Explain the concept of social entrepreneurship.**

Social entrepreneurship is the process of developing and funding solutions that directly address social issues. The primary goal is to create social value and positive change, rather than just maximizing profit.

6. **How does technology influence modern entrepreneurship?**

Technology influences modern entrepreneurship by enabling e-commerce, digital marketing, remote work, and agile business models. It allows entrepreneurs to reach global markets, enhance efficiency with tools like AI, and innovate faster.

7. **What are the key differences between a small business entrepreneur and a scalable startup entrepreneur?**

- **Small Business Entrepreneur:** Typically self-funded or funded by friends/family, hires locally, and focuses on generating profit to support a stable lifestyle. Examples include local shops or consultancies.
- **Scalable Startup Entrepreneur:** Aims for rapid growth and market disruption, often funded by venture capitalists. They believe their vision can change the world and plan for large-scale expansion.

8. **Describe one common problem faced by entrepreneurs.**

A common problem is **access to capital**. Many entrepreneurs, especially at the startup stage, struggle to secure sufficient funding to cover initial costs, scale operations, and manage cash flow, which can hinder growth and innovation.

Unit II: Opportunity Evaluation & Business Planning

Quiz Questions

Most Frequent Questions (High-Priority)

1. **What is a business plan and why is it important?**

A business plan is a formal document outlining a company's goals and the strategies to achieve them. It is important because it acts as a roadmap, helps secure funding from investors, and allows entrepreneurs to manage potential risks.

2. **Define SWOC Analysis.**

SWOC (or SWOT) Analysis is a strategic planning tool used to identify an organization's internal **S**trengths and **W**eaknesses, and external **O**pportunities and **C**hallenges (Threats). It helps in developing effective business strategies.

3. **What is a prototype and why is prototype development important?**

A prototype is an early model of a product created to test a concept. It is important because it helps validate technical feasibility, gather user feedback for refinement, reduce production risks, and attract investors.

Other Past Questions

1. **Why is a financial plan an important element in a business plan?**

A financial plan is crucial as it translates business goals into financial projections. It demonstrates the venture's economic viability to investors by detailing projected income, expenses, cash flow, and the break-even point.

2. **What does a proof of concept primarily demonstrate?**

A Proof of Concept (PoC) primarily demonstrates the **technical feasibility** of an idea, verifying that a core function or theory can be practically implemented.

3. _____ **component is key in assessing market feasibility.** Answer: Market demand assessment

4. **Identify the Activities involved in Market Demand Assessment.**

Activities include market surveys, competitor analysis, target audience analysis, and estimating market size and growth trends.

5. **Differentiate between Planning and Strategy.**

- **Strategy:** The long-term vision; it answers *what* goals to achieve and *why*.
 - **Planning:** The operational details; it answers *how* to achieve the strategic goals with specific actions and timelines.
6. **Which strategy in Porter's generic strategies focuses on offering unique products?** Answer: Differentiation strategy.
7. **With _____ growth, a company expands through its own operations using its own internal resources.** Answer: organic

Potential New Questions

1. **What are the three main types of feasibility studies?**
The three main types are Market Feasibility, Technical Feasibility, and Financial Feasibility.
2. **What is the difference between a vision statement and a mission statement?**
 - **Vision Statement:** A long-term, aspirational declaration of what a company wants to become.
 - **Mission Statement:** A statement of a company's current purpose, defining what it does and who it serves.
3. **What is the purpose of an executive summary in a business plan?**
The executive summary is the most critical section of a business plan. Its purpose is to provide a concise, compelling overview of the entire plan to capture the reader's interest (especially investors) and persuade them to read the rest of the document.
4. **Explain Porter's "Focus Strategy."**
Porter's Focus Strategy is a competitive strategy where a company concentrates its efforts on serving a specific, narrow market segment or niche. The company can use either a cost leadership (Cost Focus) or differentiation (Differentiation Focus) approach within that niche.
5. **What is a "Merger and Acquisition" (M&A) growth strategy?**
M&A is a growth strategy where a company expands by either merging with another company to form a new entity or acquiring another company outright. This allows the business to quickly gain market share, access new technologies, or enter new markets.

6. **How does cross-disciplinary collaboration aid in technological innovation?**

Cross-disciplinary collaboration brings together individuals from different fields (e.g., engineering, design, business). This fusion of diverse knowledge, perspectives, and skills fosters more creative problem-solving and leads to holistic, well-rounded technological innovations that a single discipline might not have conceived.

7. **List three common mistakes to avoid when writing a business plan.**

Three common mistakes are:

- **Unsupported Assumptions:** Making financial or market projections without credible data or research to back them up.
- **Ignoring Weaknesses and Risks:** Failing to honestly assess potential internal weaknesses and external threats, which makes the plan seem unrealistic to investors.
- **Poorly Written Executive Summary:** A weak or lengthy executive summary can cause investors to lose interest before reading the full plan.

Unit III: Marketing, Sales & Finance

Quiz Questions

Most Frequent Questions (High-Priority)

1. **List 4P's of marketing?**

The 4Ps of Marketing are:

- **Product:** The good or service being offered.
- **Price:** The amount customers pay.
- **Place:** Where the product is sold (distribution channels).
- **Promotion:** How the product is communicated to customers.

2. **Define Unique Value Proposition (UVP).**

A Unique Value Proposition (UVP) is a clear statement that describes the unique benefit of your product, how you solve a customer's problem, and what distinguishes you from the competition.

3. What is budgeting?

Budgeting is the process of creating a financial plan that estimates income and expenses over a specific period. It is a tool for controlling costs, allocating resources, and achieving financial goals.

Other Past Questions

1. **The _____ refers to the set of controllable, tactical marketing tools—product, price, place, and promotion—used to produce the desired response from the target market.** Answer: marketing mix

2. **List the key functions of HRM.**

Key functions of Human Resource Management (HRM) include recruitment, training and development, performance evaluation, compensation, and employee relations.

3. **_____ is a fundamental framework in marketing that helps businesses identify and reach their most valuable customers.** Answer: Market Segmentation, Targeting, and Positioning (STP)

4. **What does break-even analysis determine?**

Break-even analysis determines the point at which total revenue equals total costs, resulting in neither profit nor loss. It helps identify the minimum sales volume needed to cover all costs.

5. **If a company's gross profit margin is increasing but its net profit margin is declining, what could be the reason?**

This could be due to a significant increase in operating expenses, such as marketing, administrative costs, or interest expenses, which are deducted after the gross profit is calculated.

Potential New Questions

1. **What is the difference between Equity Financing and Debt Financing?**

- **Equity Financing:** Raising capital by selling ownership stakes (shares) in the company. There is no repayment obligation.
- **Debt Financing:** Borrowing money that must be repaid with interest over time. The lender does not gain any ownership.

2. What is Search Engine Optimization (SEO)?

SEO is the practice of optimizing a website's content and structure to improve its visibility and ranking on search engine results pages (like Google), thereby increasing organic (non-paid) traffic.

3. Define "Angel Investor."

An angel investor is a wealthy individual who provides capital for a business start-up, usually in exchange for convertible debt or ownership equity. They often invest in the early stages when risks are high.

4. What is the purpose of a cash flow statement?

The purpose of a cash flow statement is to track the movement of cash into and out of a company from its operating, investing, and financing activities. It helps assess a company's ability to generate cash and meet its short-term obligations (liquidity).

5. Explain the concept of "branding."

Branding is the process of creating a unique name, identity, and image for a product or company in the consumers' minds. It goes beyond a logo to include the values, promises, and personality that differentiate it from competitors and build customer loyalty.

6. What is Customer Relationship Management (CRM)?

CRM is a strategy and technology for managing all your company's relationships and interactions with customers and potential customers. The goal is to improve business relationships, help with customer retention, and drive sales growth.

7. List two legal or ethical issues an entrepreneur might face.

Two common issues are:

- **Intellectual Property (IP) Protection:** Ensuring that the company's unique ideas, brand, and inventions are legally protected from infringement.
- **Corporate Governance:** Establishing fair and transparent rules and practices for how the company is directed and controlled, ensuring accountability to stakeholders.

Unit IV: Intellectual Property – Patents & Trademarks

Quiz Questions

Most Frequent Questions (High-Priority)

1. List any two non-patentable inventions under the Indian patent Act.

Two non-patentable inventions are:

- A mere discovery of a scientific principle or the formulation of an abstract theory.
- A method of agriculture or horticulture.

2. What is a Trademark?

A trademark is a unique sign, symbol, logo, word, or combination thereof that identifies and distinguishes the goods or services of one company from those of others.

3. Differentiate between Trademark and passing off.

- **Trademark Infringement:** The unauthorized use of a *registered* trademark. It is a statutory remedy.
- **Passing Off:** The unauthorized use of an *unregistered* trademark or brand name that misleads the public into believing the goods/services are those of another. It is a common law remedy.

Other Past Questions

1. What is a Collective Trademark?

A collective trademark is a mark used by the members of a cooperative, association, or other collective group to identify their goods or services and distinguish them from those of non-members.

2. Patent Compulsory license is issued after the expiry of _____ years. Answer: three

3. A patent is a legal right granted by a government to an inventor for a specific period of time, usually _____ years. Answer: 20

4. A _____ is a symbol, word, or other identifier that distinguishes goods or services of one company from those of other companies. Answer: trademark

Potential New Questions

1. **What are the three main criteria for an invention to be patentable?**

The three criteria are:

- **Novelty:** The invention must be new and not previously known to the public.
- **Inventive Step (Non-Obviousness):** It must not be obvious to a person skilled in the relevant field.
- **Industrial Application (Utility):** It must be capable of being made or used in an industry.

2. **What is "deceptive similarity" in the context of trademarks?**

Deceptive similarity occurs when a trademark so closely resembles another mark that it is likely to deceive or cause confusion among consumers about the source or affiliation of the goods or services.

3. **What is a "well-known mark"?**

A well-known mark is a trademark that is so famous within a relevant sector of the public that its use on other goods or services would likely create a connection with the original owner. These marks receive special protection against dilution and infringement, even for dissimilar goods.

4. **Explain the "first-to-file" principle in patent law.**

The "first-to-file" principle is a legal concept where the right to a patent for an invention is granted to the first person to file a patent application for that invention, regardless of the date of actual invention.

5. **What is the difference between assignment and licensing of a trademark?**

- **Assignment:** A permanent transfer of ownership of the trademark rights from one party to another.
- **Licensing:** A temporary permission (license) granted by the trademark owner to another party to use the mark under agreed terms, without transferring ownership.

6. **Can a sound be registered as a trademark? Give an example.**

Yes, a sound can be registered as a trademark if it is distinctive and identifies the source of a product or service. A famous example is the three-note chime used by Intel for its processors.

7. What is the main purpose of the patent specification document?

The main purpose of the patent specification is to provide a complete and clear description of the invention, explaining how it works and the best method to perform it. It must disclose enough detail for a person skilled in the art to replicate the invention and defines the scope of protection through its claims.

Unit V: Trade Secrets, Industrial Designs & Copyright

Quiz Questions

Most Frequent Questions (High-Priority)

1. Identify at least two examples of information that can qualify as trade secrets.

Two examples are:

- The formula for Coca-Cola.
- A confidential customer list or a unique manufacturing process.

2. Define Industrial Design Rights.

Industrial design rights protect the ornamental or aesthetic aspect of an article. This includes its shape, configuration, pattern, or color combination, which is judged solely by the eye and is not purely functional.

3. What is "Fair Use" in copyright law?

Fair use (or fair dealing) is a legal doctrine that permits the limited use of copyrighted material without permission from the copyright holder for purposes such as criticism, comment, news reporting, teaching, scholarship, or research.

Other Past Questions

1. In case of shorthand writer, the copyright belongs to the _____. Answer:
employer (if the work is created during the course of employment)

2. Identify TWO essential legal requirements for trade secrets.

- The information must be secret (not generally known or readily accessible).
- The owner must have taken reasonable steps to keep it confidential.

3. What are the criteria for a design to qualify for registration as an industrial design?

The design must be new or original, not previously published in any country, and should be significantly distinguishable from known designs or combinations of known designs.

4. Define Performer's Rights.

Performer's rights are legal rights granted to performers (like actors, singers, musicians) to prevent the unauthorized recording, broadcasting, or communication to the public of their live performances.

5. List any two rights granted to broadcasting organizations and performers.

- **Broadcasting Organization:** The right to re-broadcast their broadcast and the right to make a sound or visual recording of their broadcast.
- **Performer:** The right to make a sound or visual recording of their live performance.

6. In order to register Industrial Design, Design should be new and _____.Answer: original

Potential New Questions

1. What is the main difference between protecting an invention as a trade secret versus a patent?

- **Patent:** Provides a 20-year exclusive monopoly in exchange for public disclosure of the invention.
- **Trade Secret:** Offers protection for an unlimited duration as long as the information remains confidential, but it does not protect against independent discovery or reverse engineering by competitors.

2. What types of works are protected by copyright?

Copyright protects original literary works (books, software code), dramatic works (plays), musical works (songs), artistic works (paintings, photos), cinematograph films, and sound recordings.

3. What is the difference between economic rights and moral rights in copyright?

- **Economic Rights:** These are rights that allow the owner to derive financial reward from the use of their works, such as the rights of reproduction, distribution, and public performance. These can be transferred.
- **Moral Rights:** These rights protect the author's personal connection to their work, including the right to be identified as the author (right of attribution) and the right to object to any distortion or modification that would harm their reputation (right of integrity). These are typically non-transferable.

4. **Explain the concept of "cybersquatting."**

Cybersquatting is the act of registering, trafficking in, or using a domain name with bad-faith intent to profit from the goodwill of a trademark belonging to someone else. The cybersquatter then offers to sell the domain to the trademark owner at an inflated price.

5. **What is a non-disclosure agreement (NDA) and how does it protect trade secrets?**

A non-disclosure agreement (NDA) is a legal contract between two parties that outlines confidential material, knowledge, or information that the parties wish to share with one another for certain purposes, but wish to restrict access to by third parties. It protects trade secrets by legally binding employees or partners not to reveal confidential information, creating a legal remedy if the secret is leaked.

6. **Can a functional design be protected under Industrial Design rights?**

No, industrial design rights protect only the ornamental or aesthetic aspects of a product, not its functional features. If a design is dictated purely by its function, it cannot be registered as an industrial design and may need to be protected by a patent instead.

7. **What is the term of copyright protection for a literary work in India?**

In India, the term of copyright protection for a literary work is the lifetime of the author plus sixty years from the beginning of the calendar year following the year in which the author dies.
